Mountain Weather Forecast

Southwest Highlands

Including Ben Nevis, Glen Coe and the rest of Lochaber, Argyll including the Isles, Loch Lomond, Trossachs and Arran

Forecast valid from 06:00 on Wednesday 27 Jan 2021 until 23:59 on Thursday 28 Jan 2021

Forecast Issued on Wednesday 27 Jan 2021 at 03:47 by Met Office Aberdeen

Confidence: High for remaining very cold with a generally fine day Wednesday and for a more settled spell Friday and Saturday, but lower for details of northward extent of snow on Thursday and timing of fronts pushing east on Sunday.

Headline for Wednesday 27 Jan 2021: Becoming mainly dry with some long sunny spells developing. Very cold.

Forecast for Wednesday 27 Jan 2021

Weather: Chance of some early patchy snow soon clearing after dawn with sunny spells developing more widely through the morning. In the afternoon the sunshine in the north becomes almost unbroken and the evening then looks dry and clear.

Chance of cloud free mountain/hill tops above 800m: Around 25% improving close to 100% by mid-afternoon.

Visibility: Periods of cloud above 600m at first gradually lifting and breaking with little or no cloud expected below summits by mid-afternoon. Away from cloud visibility very good with good panoramic views of surrounding snow covered hills, falling to just a few kilometres in any snow showers. Glare off lying snow is expected, especially in afternoon.

Met Office Aberdeen Meteorologist's View
Valley temperatures close to zero Celsius at dawn and falling below freezing quickly this evening.

Forecast for Thursday 28 Jan 2021
Weather: Cloud above the summits increasing through the early hours but remaining dry. Then a rather cloudy morning, perhaps some brightness across the north, with some patchy light snow across the south. The snow edges north through the afternoon, becoming heavy at times across the south, especially the Trossachs, where some significant snowfall is possible, with blizzard conditions and drifting snow possible, especially over higher elevations.

Maximum wind: Easterly or southeasterly 25-30mph, with a severe chill effect, easing 20mph later

Chance of cloud free mountain/hill tops above 800m: Close to 100% at first falling close to zero across the south by early afternoon and around 25% in the north by dusk.

Visibility: Little or no cloud below summits at first becoming periods or persistent above 600m across the south by early afternoon with cloud more occasional in the north. Away from cloud, very good falling to just a few kilometres in snow, less than a kilometre in heavier snow and near zero in any blizzard conditions and drifting snow.

Temperature: **Glens:** Around minus 2 or 3 Celsius at dawn rising to Around plus 2 or 3 Celsius by day
At 800m: Around minus 5 Celsius
Freezing level: 300m or less
